

Strategies for supporting pupils with Special Educational Needs and Disabilities in Reading lessons

Individual Need	Here's how we can help everyone learn...
Attention Deficit Hyperactivity Disorder	<ul style="list-style-type: none"> ● Using a non-confrontational approach and listening to the individual child will help reduce their heightened arousal. ● The use of audio books alongside the text to support children with concentration. ● Ensure the child is positioned so that the teacher has easy access for support. ● The use of fidget toys and wobble cushions can be used to aid focus
Anxiety	<ul style="list-style-type: none"> ● Where possible the child is taught by a well known adult whom they have already established a trusted relationship with. ● Allow the child to be involved when choosing a partner within the taught reading session. ● Use a consistent approach to answering questions so children become familiar with this. ● The child is in the same seat everyday and is pre-warned if the seating plan needs to change for any reason. ● Avoid asking direct questions; instead, questioning is used on a 1:1 basis where the adult has established that trust with the child. ● Where possible, children are prepared in advance when there is a change in a member of staff. ● Specific children with issues around toileting e.g the hand dryer have the opportunity to use a toilet they are familiar with.

<p>Autistic Spectrum Disorder</p>	<ul style="list-style-type: none"> ● Children are encouraged to sit where they feel the most comfortable in the classroom. Where possible, this seating plan is not altered unless the child is happy and involved in the process. ● Sensory spaces and resources are readily available to all children. ● Extra processing time is given and on the spot questioning is avoided. ● Children are allowed to read on their own if it is too challenging for them to read with a partner. ● Planned and unplanned sensory breaks are permitted throughout the lesson. ● There is always an available adult for a 'change of face' if needed. ● Where possible texts can be planned around the child's interests.
<p>Dyscalculia</p>	<ul style="list-style-type: none"> ● Children have access to their own whiteboard in the session, rather than copying from a class board. ● Questions are differentiated and the child themselves chooses the level they feel comfortable with.
<p>Dyslexia</p>	<ul style="list-style-type: none"> ● There is no pressure put on individual children to read aloud in front of the class. ● Personalised colour overlays can be used; these are readily available. ● Larger print books are available, alongside dyslexia friendly fonts and slides on PowerPoints. ● There is a huge focus on learning new vocabulary for all. ● Questions are read aloud to the child. ● Texts can be copied onto paper that best suits the child for reading clearly.
<p>Dyspraxia</p>	<ul style="list-style-type: none"> ● Rules and systems are clarified, using ambiguous language. ● Opportunity is given to move around between bursts of learning. ● Ensure that when working in pairs, the partner reader is sensitive to the needs of the child and knows confidently what they are doing.

	<ul style="list-style-type: none"> • The reading lesson is broken down into key component parts and the teacher prompts these. • There is plenty of space between readers to enable the child to concentrate on their own reading. • Noise is kept to a minimum. • The parts of the reading lesson are clearly defined.
Hearing Impairment	<ul style="list-style-type: none"> • Careful consideration is given to seating, with individual considerations made discreetly and not publicly. Only one person is encouraged to speak at a time. • There is space provided by the child at the front of the classroom with an unobstructed line of vision. • The teacher leading the lesson discreetly checks in regularly with the child to check they are hearing and understanding.
Toileting Issues	<ul style="list-style-type: none"> • Children are allowed to leave the classroom discreetly and without needing to get permission. • Toilet passes are used for children to communicate that they need to leave. • Positioning in the classroom allows the child to sit near the door so they can leave easily.
Cognition and Learning Challenges	<ul style="list-style-type: none"> • Time is given to answer questions, process and formulate answers. • The opportunity is given for reading to be physically demonstrated rather than getting the children to solely rely on verbal instructions. • Specific, targeted praise is given so the child knows what they are doing well. • Support is given when managing peer relationships effectively, the child is involved in the process of choosing a partner reader. • Instructions are simple and mistakes are considered as learning opportunities.
Speech, Language and Communication Needs	<ul style="list-style-type: none"> • Language is purposefully kept simple and consistent throughout the sessions

	<ul style="list-style-type: none"> ● Closed questions are used when exploring comprehension, which only require a yes or no answer. ● Clear language is used to communicate ideas in a small group. ● Any attempt to communicate is responded to positively.
Tourette Syndrome	<ul style="list-style-type: none"> ● Emotional reactions are filtered and we listen and respond with support and understanding ● Children are never asked to stop their tics ● Where vocal tics are prominent, children are not asked to read aloud as we are understanding that they may be reluctant to do this. ● There is a clear structure to the lesson. ● Although children are encouraged to listen, teachers are aware that at times tics inhibit auditory processing. It is never assumed that the child is intentionally not listening.
Experienced Trauma	<ul style="list-style-type: none"> ● Positive self-talk is modelled when reading. ● Mistakes are seen as a positive part of learning. ● A predictable environment with clear expectations for behaviour is provided. ● Adults will calm and support if a child becomes overwhelmed. ● Breakout spaces are available to all children.
Visual Impairment	<ul style="list-style-type: none"> ● Careful consideration is given to seating, with individual considerations made discreetly, not publicly. ● Large font materials are provided in addition to teacher talk. ● There is space provided for the child at the front of the classroom. ● The teacher leading the lesson discreetly checks in regularly with the child to check their understanding.
